

PASSIVE FIRE PROTECTION

FIRETEX PROTECTIVE TECHNOLOGIES (P) LIMITED

PASSIVE FIRE PROTECTION

Since 1969 svt is working in the fields of fire protection. Our focus has always been to achieve and adhere to the highest quality standard available. We develop, manufacture, distribute and install passive fire protection systems. Due to extensive product test and our own practical experiences from construction sites, we can assure that our products are...

- easy to install and retrofit
- with maximum protection
- highly flexible
- qualitatively high-value
- chemically safe and
- made from verifiable material

Our new product developments have to comply with stringent safety requirements to get part of the PYRO-SAFE product family. svt sets standards wherever increased safety is required: in industrial plants, airports, power stations, hospitals and residential care homes or even oil rigs, ships and the aviation industry. Our PYRO-SAFE product range includes without limitation:

- fire protection coatings,
- cable bandage systems,
- cable and pipe penetration seals,
- pipe sleeves for combustible pipes,
- water and gas- tight penetration seals,
- mortar sealings for fire protection shutters and
- joint sealings

Also available are encasings for different applications and fibre-free products, for e.g. clean-rooms and laboratories.
